I would also like to take a moment to give Kudos to the core Partner Success team who worked on this project! 👏

@Rahul Prayakarao for coming up with this feature to us and for his constant support from initial analysis to release(you have been a really passionate Product manager and your push to turn this idea into reality was really motivational!) And @Sandeep and @Mayur Ghiya for being alongside Rahul throughout and patiently accommodating as per the feedback till the end.

@Giribabu , @Saiteja NV & @Abhiram Vaddepalli for the tireless effort on technical design and analysis and pumping in the initial momentum into the project.

@rbankuru for being there as a active scrum master as well as leading the project with energy!

@Vamsi , @Venkatesh and @Surya Dheeraj - for leading the countless cross-team discussions and really driving the project forward!

@Abhishek Srivastava , @swapnil , @Seemaan M and @Sohan - for your impressive efforts and unwavering commitment from start to end!!

I am profoundly impressed and grateful for all your outstanding contributions. Your skill in design & development, teamwork in collaboration, diligence in testing, and efficiency in release have been crucial in making this first release possible. Each of you has played a key role, and your individual efforts have collectively made a significant impact. I am honored to work alongside such a talented and dedicated group 🤗 🐧
